Melon Sapo

PIEL DE SAPO melon with longitudinal writing that perfectly defines the traditional type. Its fruit is of elongated shape and "large size" ranging between 4,8-5,3 kg. Great organoleptic quality and not very sensitive to aging. It develops a very vigorous plant and can be cultivated both in the early greenhouse, where it offers a high quality product, and in the open field.

(*) These data were obtained from numerous trials in different areas. They must not be taken as an accurate guide of product performance in orther particular conditions because results could vary according to the weather, growing conditions and disease pressure conditions and disease pressure.
