CE-10409

RED ONION SHORT DAY and EXTRA EARLY ripening for dry harvesting in early APRIL. It develops a large bulb with conical shape, slightly flattened and with a pinkish-red color. THe inner red layers take 20-25 days to develop after harvest. It can be used for bunch pickings given its early bulb formation and its vigorous and healthy plant. Holds up the premature rise to flower very well.

(*) These data were obtained from numerous trials in different areas. They must not be taken as an accurate guide of product performance in orther particular conditions because results could vary according to the weather, growing conditions and disease pressure conditions and disease pressure.
