

PE-5238

Vigorous plant with good coverage and medium precocity. Square fruits 13x11 cm. and 4 well-defined locules. Its size and thick walls give it a very high average weight of 440-480 gr. It presents a very regular production. The color when ripe is light yellow. It can be used both in outdoor and greenhouse cultivation. Resistant to TMV0 and good response to nematode attack.

(*) These data were obtained from numerous trials in different areas. They must not be taken as an accurate guide of product performance in other particular conditions because results could vary according to the weather, growing conditions and disease pressure conditions and disease pressure.
