PRT-10029

Interspecific hybrid of Cucurbita maxima x Cucurbita moschata. Vigorous plant with strong root system. It interferes nothing with the grafted variety. So the results from the field are good with regard to the quality and yield. In the nursery a high uniform germination is achieved, which increases the yield in grafted plant. RESISTANCES: Fusariumoxysporum sp. niveum (Fon).

(*) These data were obtained from numerous trials in different areas. They must not be taken as an accurate guide of product performance in orther particular conditions because results could vary according to the weather, growing conditions and disease pressure conditions and disease pressure.
