

CE-10489

SHORT-DAY RED onion variety with EXTRA-LATE maturation, for harvest at the end of May or early June. The bulb is slightly flattened pear-shaped, with intense red color throughout all layers. The plant is very healthy and dark. It has good bolting resistance, even in early sowings.

(*) These data were obtained from numerous trials in different areas. They must not be taken as an accurate guide of product performance in other particular conditions because results could vary according to the weather, growing conditions and disease pressure conditions and disease pressure.
