

M-10699

New in the GALIA market with ORANGE flesh. Round, slightly flattened fruit of 1.5 kg medium weight and deep orange flesh. Abundant and intense netting. It stands out for its high brix of 14.5 ° and the uniformity in production. It develops a very vigorous, dark and very resistant to powdery mildew plant.

(*) These data were obtained from numerous trials in different areas. They must not be taken as an accurate guide of product performance in other particular conditions because results could vary according to the weather, growing conditions and disease pressure conditions and disease pressure.
