

CE-10368

MIDDLE cycle SHORT DAY onion, especially recommended for those producers where production takes precedence over early. Harvest can be started from the end of APRIL to the beginning of MAY with direct sowing from September 25 until mid-October. It produces large bulbs of rounded shape, very consistent and of great conservation.

(*) These data were obtained from numerous trials in different areas. They must not be taken as an accurate guide of product performance in other particular conditions because results could vary according to the weather, growing conditions and disease pressure conditions and disease pressure.
