

CE-10407

Interesting variety of RED onion for SHORT day and MEDIUM ripening. Sowings can be made from mid-September for harvests at the end of APRIL without problem of premature rise to flower. It develops large bulbs of good color and conical shape.

(*) These data were obtained from numerous trials in different areas. They must not be taken as an accurate guide of product performance in other particular conditions because results could vary according to the weather, growing conditions and disease pressure conditions and disease pressure.
