

M-10461

Melon Sapo

PIEL DE SAPO melon very netted. The shape is slightly elongated oval and with a size that can range between 4,0-5,0 kg. Its highlights is the great organoleptic quality and uniformity. It develops a vigorous and very healthy plant. Excellent results both in early crops in greenhouses and outdoors.

(*) These data were obtained from numerous trials in different areas. They must not be taken as an accurate guide of product performance in other particular conditions because results could vary according to the weather, growing conditions and disease pressure conditions and disease pressure.
