

PE-10172

Cucumber Dutch

Variety suitable for July plantings in the early autumn cycle and February plantings in the spring cycle, noted for the quality of its fruits throughout the production phase. The plant has medium vigor, with short internodes and one or two fruits per node. The fruits have consistent LENGTH throughout the cycle, are straight, and have an attractive DARK GREEN color. Resistant to the Yellow Vein Virus (CVYV) and the Yellowing Virus (CYSDV).

(*) These data were obtained from numerous trials in different areas. They must not be taken as an accurate guide of product performance in other particular conditions because results could vary according to the weather, growing conditions and disease pressure conditions and disease pressure.
