PRT-10202

New hybrid rootstock, which has been developed to obtain great results in grafting. The size of the seed is 20% smaller than the conventional one and its main asset is the absence of damage to the cotyledons when it germinates and an extraordinary uniformity. The grafted plant develops VERY VIGOROUSLY.

(*) These data were obtained from numerous trials in different areas. They must not be taken as an accurate guide of product performance in orther particular conditions because results could vary according to the weather, growing conditions and disease pressure conditions and disease pressure.
