

RS-5414

Hybrid rootstock of *C. maxima* and *C. moschata*. Developed for farmers who want a plant **MORE VIGOROUS** than RS 5058. In the seedbed, it develops a seedling of broad cotyledons without damage. That produces very uniform plants with a great use for grafting.

(*) These data were obtained from numerous trials in different areas. They must not be taken as an accurate guide of product performance in other particular conditions because results could vary according to the weather, growing conditions and disease pressure conditions and disease pressure.
