Dark striped watermelon

TRIPLOID variety of the DARK STRIPED type that is part of the Zebra segment but with a completely round shape and a weight between 5.6-6.2 kg. It stands out for its FIRM pulp and very hard rind. Despite its only 12 mm, it makes it highly resistant to transport. All this together with an intense red pulp, very crunchy and sweet, combined with a vigorous, dark and very healthy plant, make it a very interesting variety for both FRESH and PROCESSED markets.

(*) These data were obtained from numerous trials in different areas. They must not be taken as an accurate guide of product performance in orther particular conditions because results could vary according to the weather, growing conditions and disease pressure conditions and disease pressure.
