

TF-10438

A variety of INDETERMINATE tomatoes of the CLUSTER type with excellent uniformity in the formation of clusters, distribution and size of fruits. It is also noted for its excellent results in winter when it offers very good production. The fruit is slightly flattened and has a very good red colour. It incorporates the triple resistance to TSWV, TYLCV and ToBRFV.

(*) These data were obtained from numerous trials in different areas. They must not be taken as an accurate guide of product performance in other particular conditions because results could vary according to the weather, growing conditions and disease pressure conditions and disease pressure.
