INNOVATIVE  
ORANGE FLESH

# MELON VARIETY CATALOG

AFTER MORE THAN 7 YEARS OF RESEARCH IN A MELON IMPROVEMENT PROGRAM, INTERSEMILLAS OBTAINED A DIFFERENTIATING AND UNIQUE PRODUCT: **SOROLLA**, PIEL DE SAPO MELON OF ORANGE FLESH, WITH HIGH NUTRITIONAL PROPERTIES.

The improvement program in melon carried out by the R&D Department, presented SOROLLA in 2017, a differentiating variety due to its orange flesh color it provides great organoleptic quality and inimitable post-harvest resistance. Since then, we have not stopped investigating and obtaining new incorporations.

THE ORANGE FLESH MELON noted for its high content of beta-carotene, **12 times higher than traditional piel de sapo melon.**

Beta-carotene is a natural nutrient abundant in nature and very important for the human diet, **the main source of safe vitamin A**, essential for normal growth and development, the functioning of the immune system and vision.

### BENEFITS OF BETA CAROTENE

- Prevent diseases
- Protect our vision
- Take care of our mental health
- Combat respiratory problems

## PIEL DE SAPO MELON

# M-5770

THE FIRST ORANGE FLESH PIEL DE SAPO
